PROJECTS

Employee Management System

- The Employee Management System is a Java Swing application that allows you to manage employee records efficiently.
- Implemented CRUD operations to enable the creation, retrieval, updating, and deletion of employee records, reducing data entry errors.
- Integrated MySQL database for data storage, ensuring data consistency and security.
- Developed a user-friendly interface with intuitive navigation and data validation features.
- Added user authentication and authorization for enhanced security.

Ecommerce Website

- This is a simple eCommerce website built using HTML, CSS, JavaScript, and PHP with a MySQL database.
- It includes user authentication features such as login and signup using XAMPP as the local development server.
- User Registration: Users can create new accounts with a unique username and password.
- User Authentication: Registered users can log in to access their accounts.
- Product Catalog: Display a list of products available for purchase.

News Website

- Daily Samachar is a dynamic news website that fetches real-time news articles using a News API and presents them in a user-friendly and aesthetically pleasing manner.
- The website is built using HTML, CSS, and JavaScript, making it a lightweight and responsive platform for users to stay up-to-date with the latest news from various sources.
- Daily Samachar provides a clean and intuitive interface, making it easy for users to navigate through news categories and read articles.
- Users can explore news articles from different categories like technology, sports, business, entertainment, and more.
- A search feature allows users to look for specific news topics or keywords within the available articles.
